

Silent Gliss

HEALTHCARE SYSTEMS

SilentGliss

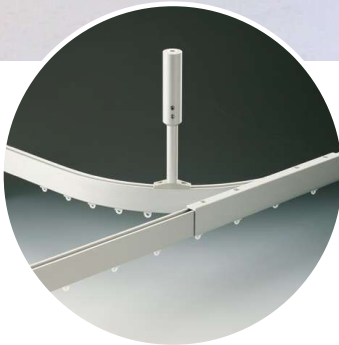

Healthcare Shading and Room Dividing

For over 60 years Silent Gliss curtain and blind systems have been the leading choice for the healthcare sector in the UK and internationally.

Our range of cubicle, curtain tracks and blinds provide essential shading comfort and privacy on wards, in consulting rooms and in offices.

ANTIMICROBIAL COATING

An anti-microbial coating aids protection against harmful bacteria including MRSA and E-Coli, decreasing the risk of cross contamination. Supplied as standard on our white cubicle track system SG 6100, it complements existing hygiene routines by reliably inhibiting bacterial growth. The SECOND line of defence.

SYSTEM SG 6100

A strong, rigid, versatile profile for clean, unbroken lines in hospital wards. The top channel maximises connection and suspension opportunities with a dustcover strip to reduce the risk of cross infection. Supplied in silver or white, which incorporates an antimicrobial coating. Available with safety device SG 6650.

Conforms to Health Building Note 0010 Curtains and Tracking Part E – Curtains and tracking.

SYSTEM SG 6103

System SG 6103 offers a contemporary rounded profile and boasts similar benefits to system SG 6101 – strong, rigid and flexible layouts. Also available in silver or white, the top channel maximises connection and comes with a dustcover strip to reduce the risk of cross infection.

SUSTAINABLE

Silent Gliss products are manufactured within an environmentally friendly, safe and socially responsible framework. We strive for sustainable growth through the harmonisation of economical, ecological and social factors.

SAFETY DEVICE SYSTEM SG 6650

For use with System SG 6100. The SG 6650 Safety Device System is installed in hospitals all over the world. Designed for high-risk areas to minimise the opportunity for patient self-harm.

The track functions as normal during everyday use with the precision engineered safety device only coming into action should an incident occur. The inconspicuous design ensure the safety device blends into the room design, without appearing any different to the standard cubicle system.

Existing SG 6100 installations can normally be easily converted to include SG 6650 safety device.

Uniquely designed wall support and brackets that ensure the track separates with a direct downward pressure at a given weight. During separation, they will tilt and/or pivot to minimise damage.

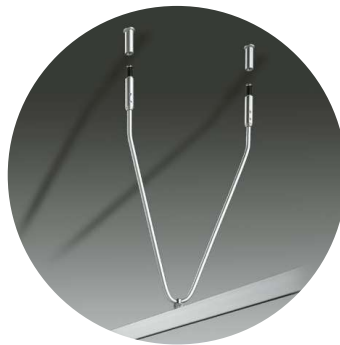

Important

SG 6650 system is intended to reduce the risk of self-harm in cubicle situations. It must be fitted in accordance with the instructions by a Silent Gliss trained Cubicle Distributor. Failure to do so will reduce its effectiveness.

The single hanger safety device incorporates friction-based joints which progressively separate under known loads, pictured here in the process separated.

V-hanger incorporating a safety device illustrating the separation process.

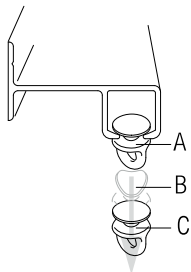

Special connecting bridge which reduces the risk of “domino effect” where one cubicle brings down attached systems.

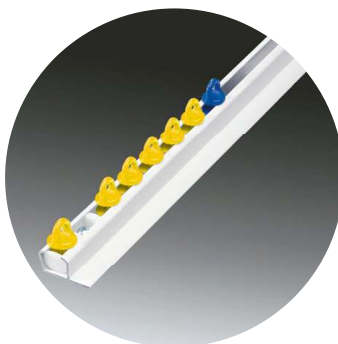

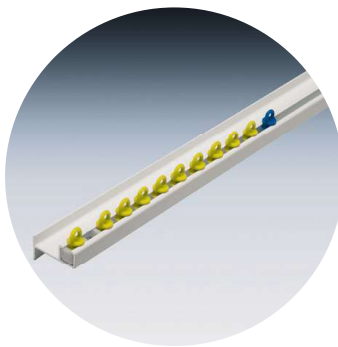

SILENT GLISS SAFETY CURTAIN TRACK SYSTEMS

Hand drawn safety curtain tracks SG 6021 and SG 6290 are designed to minimise the risk of self-harm at windows. Unique gliders separate from the profile when a specific weight is applied. The systems are directly fixed without a gap between profile and wall or ceiling. Suitable for light to medium weight curtains. Ideal for schools and hospitals.

- A Glider is easily clicked into the profile
- B Glider deforms under pressure
- C Glider releases under pressure

OTHER SILENT GLISS PRODUCTS

Silent Gliss have a wide range of other shading systems suitable for use in healthcare environments.

Our range includes roller and vertical blinds along with wide range of curtain tracks.

Enquire at Silent Gliss or with your local Silent Gliss Cubicle Distributor.

Fabrics – Beyond Decoration

The Silent Gliss Collection sets itself apart by considering both the fabric's texture and technical features. We offer a wide range of styles and colours that balance function and design across all of our window treatment systems.

We include fabrics with special functions such as acoustic performance, superior light management, antimicrobial and environmental considerations. All of our fabrics are flame retardant and have been extensively tested on our systems to ensure consistent hanging behaviour.

Check out the Silent Gliss online fabric finder.

Exclusive Colorama fabric available in 30 colours and washable up to 72°

Colorama Bioactive, exclusive antibacterial Trevira CS Bioactive with inherent silver ions and washable up to 72°

Valere, antibacterial stain-resistant fabric and washable up to 72°

Technical summary Healthcare Systems

SYSTEM	DESIGN	OPERATION	WAVE	USEFUL INFORMATION
SG 6100		Hand 		<ul style="list-style-type: none"> – Bendable – Suspended – 2-component (2C) glider technology – Silver, White as standard. Special colours possible – White paint incorporates anti-microbial coating as standard
SG 6103		Hand 		<ul style="list-style-type: none"> – Bendable – Suspended – Silver, White as standard. Special colours possible
SG 6650		Hand 		<ul style="list-style-type: none"> – For use with SG 6100 – Quick release safety device; reducing the risk of self harm – Progressive disconnection of friction-based joints, wall supports and brackets at maximum static load of 40 kg – Simple re-connection of hangers and brackets after separation – Silver, White as standard. Special colours possible
SG 6021		Hand 		<ul style="list-style-type: none"> – Safety gliders reducing the risk of self harm – White as standard. Special colours possible – Wall fitting
SG 6290		Hand 		<ul style="list-style-type: none"> – Safety gliders reducing the risk of self harm – White as standard. Special colours possible – Ceiling fitting

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatments. Since 1952 we have been tirelessly committed to the development of the worlds' smoothest, quietest systems using state of the art technology.

Driven by customer needs, Silent Gliss offers functional and durable products. Expert technical advice coupled with installation and support services complete the offer. Silent Gliss stands for innovative, sustainable, tailor made solutions, exceptional design and first-class quality.
